COVID-19: Data talk!

But what are they saying?

7 hints

Gianmarco Altoè

Psicostat, DPSS - University of Padua

April 15, ZOOM

- ➊ Always put a denominator in it
- ➋ Contextualize data and findings . . .
at least in spatio-temporal perspective
- ➌ Remember that Science does not give certainty.
Science tries to reduce uncertainty
- ➍ Be skeptical about media claims on statistical findings.
Check the original scientific paper
maintaining a critical attitude
- ➎ Take into account that all statistical models
are based on assumptions
- ➏ Remind that Statistics is a tool
- ➐ “Statistics is hard”
